The Rehabilitation Centre of National Narcotics Board (BNN) Baddoka is one of the work units of the National Narcotics Board which was established to provide rehabilitation services to help and assist drug addicts to recover from drugs addiction so that they can regain a good future. The main problem in this study is to see how well service standard of the Rehabilitation Center of National Narcotics Board Baddoka Makassar. The purpose of this study was to analyze the service standard of drug abuse rehabilitation for the initial intake process, medical rehabilitation services and social rehabilitation services based on time, human resources and instruments used at The Rehabilitation Center of National Narcotics Board Baddoka Makassar.

This research is a descriptive qualitative research with data collection techniques carried out through observation, interviews, and document review. Data analysis was carried out in three stages, namely data reduction, data presentation and verification.

The results show that there was no Standard Operating Procedure (SOP) for initial intake outside of working days and hours, it is necessary to improve human resource competence through training about drugs addiction and add more human resources as needed and there are still instruments that have not been used as stated in the standard of rehabilitation service for the National Narcotics Board.

Keywords: Rehabilitation service standards, Drug abuse, Initial intake, Medical rehabilitation, Social rehabilitation.
