ABSTRACT

***ANALYSIS OF FINANCIAL REPORT TRANSFORMATION IN IMPROVING THE QUALITY OF FINANCIAL REPORT INFORMATION OF* HAJI TENRY DIGITAL PRINTING**

Author : Nurul Najmiatul Islamiyati
Supervisor : Ashar Muhammad

*Transformation of financial reports has become an essential need for Small and Medium Enterprises (*Usaha Mikro, Kecil, dan Menengah (UMKM)*), particularly in improving the accuracy, efficiency, and quality of the provided information. An accurate financial report plays an important role in supporting decision-making, business planning, human resources management, and improving access to the funding. Thus, this study aims to find out the transformation of financial reports which are accurate and comply with the Financial Accounting Standards (*Standar Akuntansi Keuangan or SAK) *at* Haji Tenry Digital Printing.

This study applied a descriptive method. The data were collected through interviews, observation, and documentation of the recording activities and financial reporting before and after the transformation.

The result shows that before the transformation, the financial recording was conducted manually through a cash book and physical receipts, making it vulnerable to recording errors, document loss, and delays in report preparation. After the transformation using the SIAPIK *application, the recording process became more orderly, accurate, and efficient. This application enables the presentation of financial information in real-time and complies with Financial Accounting Standards for Private Entities (*Standar Akuntansi Keuangan Entitas Privat (SAK EP)*). In addition, the transformation has also increased the businesspeople's awareness of the urgency of financial reports for more accurate business decision-making. The digitalization of the financial report system has proven to accelerate workflow, enhance the information reliability, and assist business owners in gaining a comprehensive understanding of their financial condition. In conclusion, using the* SIAPIK *application brings a positive impact on the quality of financial report information. It is suggested to perform this system continuously, as well as provide training for the staff to ensure the optimal use of the application.*

Keywords: *Financial Report Transformation, Information Quality,* SIAPIK, UMKM, SAK EP.
