ABSTRACT

IMPLEMENTATION OF EDUCATION, COUNSELING, AND TRAINING AS PART OF FLOOD DISASTER MITIGATION IN* MAKASSAR *CITY

Author : Jusmayani
Supervisor : Ady Hermawansyah

This study discusses the implementation of education, counseling, and training as part of flood disaster mitigation in Makassar *City, aiming to identify the implementation process and the factors influencing the success of flood mitigation, so that appropriate strategies can be developed to reduce disaster risk. Specifically, this study seeks to determine the implementation of mitigation efforts and the factors that hinder them.*

*The study employed a qualitative approach with a descriptive method. The study was conducted at the Regional Disaster Management Agency (*BPBD*) of* Makassar *City and in three flood-prone subdistricts. The data were collected through interviews, observations, and documentation.*

The results show that the implementation of flood mitigation is influenced by limited personnel and facilities, varying levels of community participation, and less-than-optimal inter-agency coordination. These results emphasize the need for strengthening resource capacity, improving coordination, and enhancing community participation to increase the effectiveness of flood mitigation efforts in Makassar *City.*
