The task of the Navigation District is to carry out planning, operation, procurement and supervision of shipping navigation aids, shipping telecommunications, sea observation activities, hydrographic surveys, as well as the monitoring channels and crossings using installation facilities for the benefit of shipping safety. This task demand is the main basis for all employees to have the competence to know how to use the results of adequate employee training in carrying out their duties.

This type of research is descriptive qualitative research. The data collected is in the form of words and images, not numbers. The data analysis method in this study uses content analysis with the stages of data reduction, data presentation, drawing conclusions and verification.

The results showed that the types of training that had been attended were General Radio Operator (Operator Radio Umum *or* ORU)*, The Operator of Vessel Traffic System (VTS), Deck Officer of the State Ship* (Perwira Deck Kapal Negara *or* PDKN)*, Basic Safety Training (BST), Hydrographic Surveyors. The impact obtained from the training attended is seen from the service aspect and the effectiveness and efficiency of water traffic services at the* Makassar *City port, which is more regular and has a minimum risk.*

Keywords: Training Type, Competency and the Impact
